

Solana Blockchain Development

Solana - A more Advanced Version of Ethereum, ETH

Solana Overview

First Release - February 2018

Founder - Anatoly Yakovenko

Founding Company - Loom Network

Core Contributor - Solana Labs, Solana
Foundation

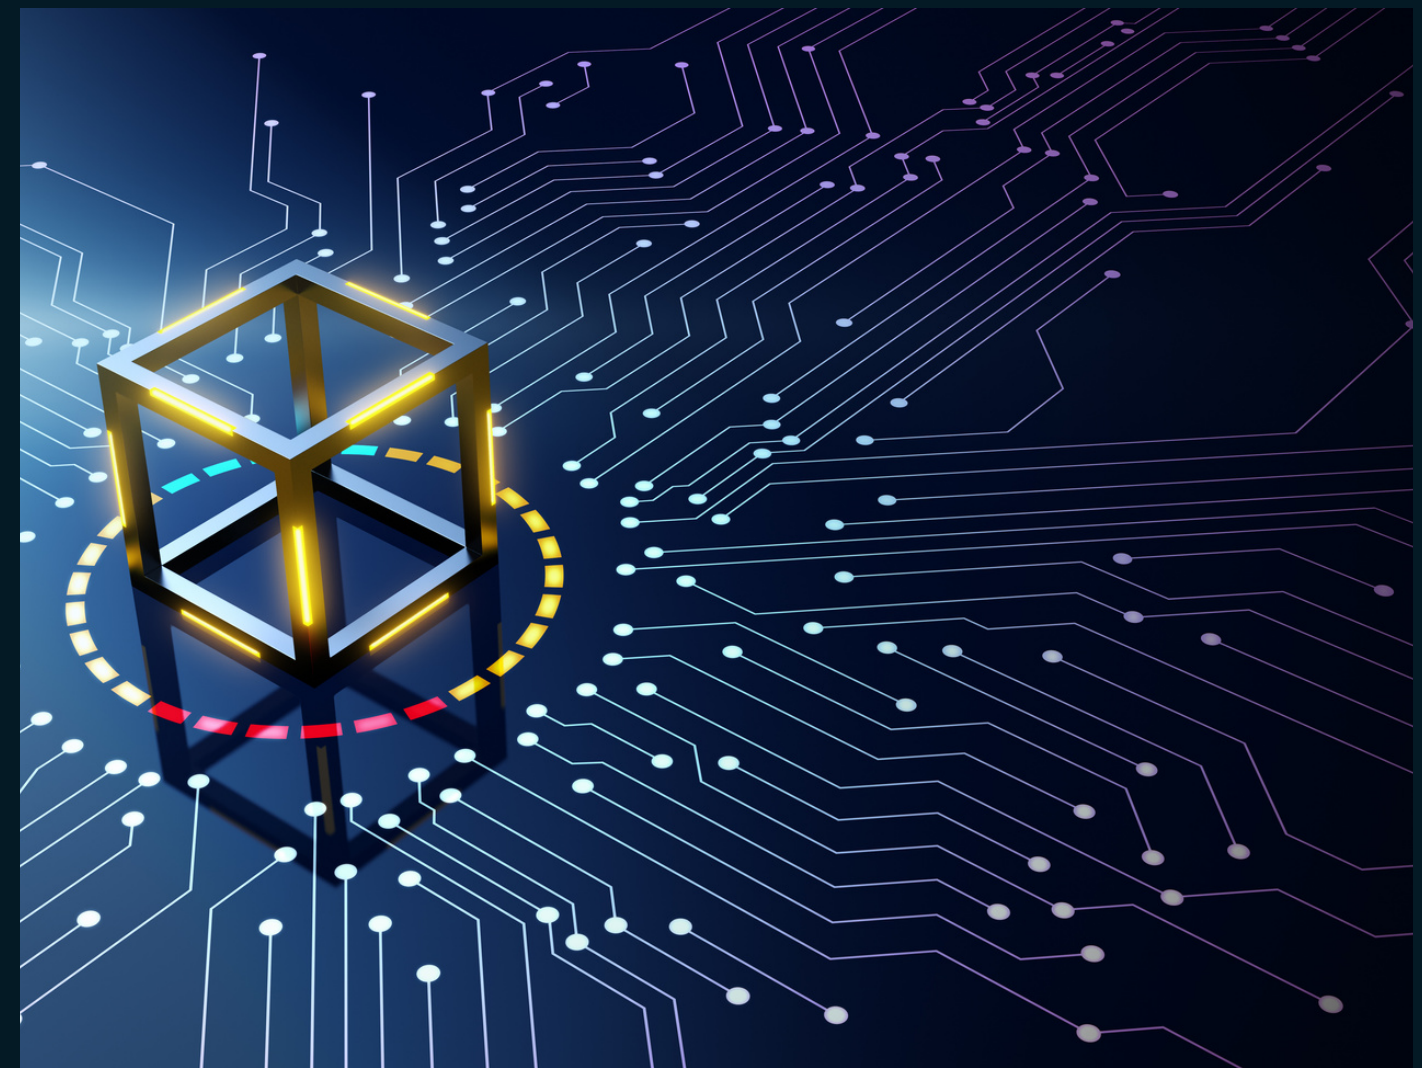

Consensus Mechanism - Proof of History

What is Solana ?

Solana is a decentralized programmable blockchain network that runs multiple decentralized finance operations. Similar to Ethereum, Solana offers capabilities for storing smart contracts that can be programmed for fulfilling the transactions when certain conditions are met.

Features Of Solana Blockchain

Proof of History

Gulf Stream

Tower BFT

Pipelining

Cloudbreak

Sea Level

Why Choose Solana For Blockchain Development?

Solana makes itself the perfect fit for any blockchain-related development, as it delivers various breakthrough solutions which make it a performant layer.

Listed here are some of the valid reasons behind choosing Solana Blockchain over another blockchain network

- There is no state like others as part of its program
- Presence of on-chain clock verification which is absent in Ethereum Blockchain
- It removes the mempool
- Block speed of Solana is the main benefit
- The low fees enable the experience of the Next-Gen launchpad platform
- Solana has the potential to drift the DeFi space
- Supports for 65,000 TPS & designed to scale together with hardware & bandwidth

Solana Blockchain Development Services

Solana Blockchain Development

Solana Dapp Development

Solana DeFi Platform Development

Solana DeFi Dapp Development

Solana Exchange Development

Solana NFT Development

Solana NFT Marketplace Development

Solana Smart Contract Development

Solana DEX Exchange Development

Solana Smart Contract MLM Development

Solana Blockchain Development Company

Bitdeal - Leading [Blockchain Development Company](#) offers blockchain development services and solutions on various trending blockchain platforms such as Cardano, Solana, Ethereum, EOS, TRON, Polygon, and more. As in recent days, Solana strikes the sky in the crypto globe, Our Blockchain Experts have started providing services on Solana Blockchain Network. Our Experts develop & deploy Non Fungible Tokens (NFTs), NFT Marketplaces, Gaming Platforms, Collectibles, Exchanges, and more on the top layer of open-source public blockchain network, Solana.
